Sprocket made out of alloy steel with reinforced geometry at stressed.

IDLER ASSEMBLY

UPPER ROLLER

LOWER ROLLER

OUR PRESENCE

We serve the segments covering a vast spectrum of customers spread all over the country engaged in construction, excavation, mineral, mining & oil exploration through its various warehouse in major towns, cities & business associates at other places. You are never far from a **Kem** Authorized Representative. We keep adequate stocks at all locations so as to avoid the "No stock" or "Wait a bit" situation. "Demand your needs and we shall be happy to serve you"

NETWORKING

With recent developments in communications **Kem** has networked all its offices giving an edge over its competitors thereby directly benefitting the customer by way of faster deliveries and shorter lead times. On line after sales service facilities.

Trace rollers are sealed and lifetime lubricated wide langes resist rollover. High strength steel and deep hardening virtually eliminate wear, shock loads and bell mounting sleeve bearings and large hardened shafts absorb impacts and deflection.

COMPANY POLICY

We at **Kem** are committed to ensure the customer-satisfaction and value for investment thru timely supplies of (High Reliability) Earthmoving Spares

Your nearest **Kem** Authorized Representative :

For Anykind of development Job Contact to our Representative or email : kem@icenet.net
